

## SENIOR NETWORK ENGINEER - SERVICE OPERATIONS

- Sydney
- \$70,000 & \$18,000 car allowance & super
- Excellent Opportunity

With an unparalleled reputation for new technical product and business innovation this leading multinational has attained 'icon' status in the industry it serves. Continual investment in research and development has enabled this organisation to deliver the most technologically advanced products and systems to date.

This role materialises at an exciting and challenging time in the company's development and offers an exceptional opportunity for an individual to join a company undergoing rapid change.

This is a unique role involving contact with internal and external customers and will involve;

- Identifying and solving customer information and processing problems
- Maintain all computer and peripheral systems within the businesses
- Assist in the implementation of new Software
- Coordination of a team and Management of Projects

Specific duties and tasks will be varied to include the following;

- Ensure the heterogenous networks (LAN/WAN/VPN's) are maintained
- Be the primary contact for all workflow and hardware issues within New South Wales
- Ensure all user requirements are met with regards to software, hardware and any other needs
- Assist and implement projects as required
- Be the key contact with external service providers

The successful candidate will have a minimum of 3 years relevant experience, be self motivated and able to work autonomously and as part of a team on projects. A comprehensive appreciation of Windows Server, Windows clients, Adobe, and Desktop applications such as Quark would be advantageous. The ability to provide a solutions based service to end users is vital in this role.
